INTRODUCTION

The ultimate message of Bible prophecy is not one of doom and gloom, but rather the hope of redemption when Christ returns. The Church and the earth itself will be redeemed by Jesus Christ, the Lord of the universe. We have this sure promise in the person and completed work of Jesus. The redemption of humanity and the earth will take place in our generation, with the return of Christ to set up His Kingdom.

In *The Global-Warming Deception*, we will look at the anthropogenic global warming (AGW) movement in light of God's truth as it is revealed in the Scriptures. We will examine the hidden, sinister political agenda of an elite group that uses supposedly legitimate nongovernmental organizations (NGOs) to advance its own interests. We will also look at a large number of taxpayer-funded groups that help advance a diabolical environmental agenda.

Why is so much of the globalist agenda hidden from public view? On the surface of things, it would seem that organized efforts to combat global warming should result in benefits for all of us. Who wants to see temperatures increase to the point that glaciers and icecaps melt, flooding coastal regions and allowing salt water to contaminate a good portion of the world's supply of fresh water? Who would want to see average global temperatures rise so high that significant plant and animal life are threatened, and humanity is forced to develop new technologies just to enable humans to survive in an increasingly hostile environment?

No one wants that to occur. And if the highly publicized environmental dangers were based on certain scientific fact, we would be foolish if we failed to combat the threat with every resource we have. But does hard science back

up the widely accepted claim that human activity—primarily related to the use of fossil fuels—is the major cause of global warming? And has unbiased science fully documented a rise in average global temperatures? These are a few of the crucial questions that will be answered in the chapters that follow.

I have been a committed environmentalist since I was a teenager. I have long embraced conservation of the earth's species and habitat as a biblically supported principle. When I joined Abitibi Paper Company at its Toronto, Canada, headquarters in 1968, I not only supported recycling of paper at our Thorald paper mill, but I assisted in the creation of the recycling symbol (the mobius strip) to depict our commitment to utilize recycled paper as part of an environmental program that was still in its infancy. Variations of this recycling symbol were developed in numerous nations and are now used globally.

Preservation of the environment is a biblical mandate for all Christians and Jews who treasure the Word of God. However, we must also protect our Judeo-Christian values, which are under attack from radical environmentalists who seek to destroy the fundamental principles of Western civilization.

With the fall of the Soviet Union and the Soviet Eastern bloc in the late twentieth century, powerful socialistic forces began looking for a new strategy to use in establishing a global, totalitarian, socialist regime. Communism and socialism had been proven politically and economically bankrupt. Even Communist China is now thriving with a heavily regulated and limited form of capitalism under totalitarian political control. The world has become a very different place since Mikhail Gorbachev dismantled the Soviet Communist Party, leading to the dissolution of the USSR in 1990–91.

Most of the formerly Communist nations (except North Korea and Cuba) have either rejected the discredited system outright or have adapted it, as is the case with China, to take advantage of the overwhelming economic ben-

efits of capitalism. The globalist elite, while not abandoning their socialist-Marxist goals, have taken a more devious approach. They came up with a political strategy that is far easier to sell to the general public, news media, educators, and national governments. Their new strategy has been working extremely well in influencing public opinion and attracting massive public support. Without revealing their ultimate goal, the globalist elite have been transforming the regulations, laws, economies, and societies of the world.

In this book we will examine the dark soul and hidden motivations of the AGW movement. The international effort to "save" humanity from the proclaimed future threat of an unbearably warm climate is built on lies, manipulated research, the destruction of historical temperature data, and the intimidation and silencing of climate-change critics. The movement's goals are imposed on sovereign nations by means of binding, unendorsed international treaties. We will weigh the evidence that demonstrates that almost everything we have been told about humanity's contributions to global warming is a deliberate distortion of the facts.

The global-warming deception is so effective because it is based on a partial truth. As we often read in Scripture, when Satan deceives a person, he uses a partial or twisted truth to bait the trap. In just about every instance, save Satan's quoting of Scripture to Jesus in the desert, Satan was successful in his deception. The serpent twisted the words of God in the garden to deceive Eve and left all of humanity with the tragic inheritance of sin. Satan has used minor doctrinal differences, with both sides arguing against the other based on Scripture, throughout church history to divide Christians and to split churches. Satan masquerades as an "angel of light" to deceive as many as possible: "And no marvel; for Satan himself is transformed into an angel of light" (2 Corinthians 11:14).

We see the same pattern in the machinations of the globalist elite, as they

seize upon an outwardly noble cause to protect the environment. They begin with the truth: With population growth and increased industrialization in China, India, and other developing nations, humanity is increasing its reliance on fossil fuels. Inevitably we are contributing more and more carbon dioxide (CO₂) every year to the atmosphere. A skilled deceiver always begins with the truth.

Global-warming alarmists, including former vice president Al Gore and the United Nations Intergovernmental Panel on Climate Change (IPCC), point out that the level of CO₂ in the atmosphere has increased annually since the 1860s Civil War. The continued growth in the world economy (especially China's and India's) will accelerate the rate of increase of the level of CO₂ in the atmosphere.

Now for the lie and the imposed guilt that comes with it. After displaying a graph illustrating rising levels of CO_2 , the champions of limiting AGW turn to another graph illustrating the pattern of rising global temperature during the same period of time. The implication is clear: as the level of CO_2 rises, the level of global temperature will inexorably rise as well. However, there is no consistent, peer-reviewed scientific research that establishes a cause-and-effect relationship between increased atmospheric CO_2 and higher global temperatures.

It's a clever deception, but a lie nonetheless. The AGW hoax lacks any basis in independently verifiable science. It is built on a grain of truth and a well-formed foundation of exaggeration, deliberate deception, and strong-arm tactics to promote the AGW view with educators and media.

In many cases, it is well-meaning environmentally focused people who work to prevent the global warming "crisis." They want to spare humanity an uninhabitable world. But they were conscripted into the movement by deliberate lies, and they work unknowingly to advance the agenda of an unseen globalist elite. The organized effort to combat AGW is the tactic chosen by

the globalist elite to impose a centralized, worldwide socialist-Marxist government. They have frightened citizens and coerced governments, and so far nothing has stood in their way.

Abraham Lincoln has been credited with numerous statements that may or may not have originated with him. One of his statements reveals a profound human and political truth. He held that people generally have two reasons they use to justify every decision they make. The first is a public reason and it appears logical. But this reason—which is shared with others—is seldom the real underlying, motivating reason for the action taken. The actual underlying reason is hidden and based on emotion. This second reason is the *real* motivating reason for the decision.

Unless we understand a person's second, hidden reason, we will never understand the true motives behind that person's actions. As you read the documentation in this book, you will realize that those who lead the effort to combat AGW are not primarily motivated to reduce future global temperature increases. Instead, they are bent on forcing the capitalist, free enterprise economies of the West to submit to a global socialist-Marxist government.

Students of Bible prophecy will see many familiar themes throughout this book. Leaders in the AGW movement give us a near-textbook object lesson in implementing the global government agenda in the last days. The great themes of biblical prophecy, the last acts of the powerful story of redemption, the ultimate battle between God and Satan, all of these will take place in our generation. As you read *The Global-Warming Deception*, keep these truths in mind. We are witnessing the unfolding—in public policy, international relations, and false environmental science—of a major tactic being used by Satan to advance his evil agenda on earth. He will ultimately fail, as we know, but prior to his fall he will send his emissary, the Antichrist, to rule the earth as the coming global dictator.

The unprecedented rise of global government in our generation was

prophesied by Daniel twenty-five hundred years ago. Daniel warned about the rise of a revived Roman Empire that would be "diverse from all kingdoms, and shall devour the whole earth, and shall tread it down, and break it in pieces" (Daniel 7:23).

The apostle John also warned of the rise of a global dictator, the Antichrist, who would rule the earth in the final seven years of tribulation until he and Satan will be defeated by Jesus Christ at the Battle of Armageddon.

And I saw the beast, and the kings of the earth, and their armies, gathered together to make war against him [Jesus] that sat on the horse, and against his army. And the beast was taken, and with him the false prophet that wrought miracles before him, with which he deceived them that had received the mark of the beast, and them that worshipped his image. These both were cast alive into a lake of fire burning with brimstone. (Revelation 19:19–20)

We will examine in detail the far-reaching global-warming deception, which is the greatest threat to our nation and our basic liberties and freedoms in our generations, as well as to our standard of living. Our parents and grandparents faced the threat of Nazi Germany, Japanese militarism, and global Communism, and they triumphed. The threat to our fundamental liberties from the global-warming deception is just as dangerous. If we do not awaken to face the hidden socialist and globalist agenda of those who wish to destroy our Judeo-Christian values and democratic freedoms, then the proponents of AGW alarmism will win.

The Hidden Agenda of Global Warming Is Global Government

he biblical prophets described a centralized world government that will gain complete power over all the nations in the last days. Once the "revived Roman Empire" structure is set in place and preliminary work has been done to quell opposition to the global regime, Satan's most accomplished and most powerful servant will appear. The Antichrist will enter the scene as the global dictator, at first with promises of world peace, economic prosperity, and other socialist "spread the wealth" assurances. He will convince the people of the world that he alone can assure their well-being and security. Daniel warns that the Antichrist "shall divide the land for gain" (Daniel 11:39). Satan and the Antichrist are experts at using deception to achieve their goals. Deception is also the preferred method of those leading the anthropogenic global warming (AGW) movement.

The leaders and supporters of the AGW movement have perpetrated an elaborate deception on the citizens, the statesmen, and the nations of the world. A far-reaching global-warming industry has already achieved many of its initial goals. It is given credence by governments, the media, politicians, individual citizens, and much of the scientific community. In less than a quarter century, the environmental movement has grown from spreading the word about the so-called dangers inherent in humanity's impact on climate change to commanding the force of numerous United Nations agencies. Leaders of the AGW movement now have the ability to convene international summits and force nations to violate their own constitutions in signing international climate agreements. These agreements will drastically reduce the standard of living as well as the economic freedom of the citizens of Western democracies.

If you examine the ultimate goals of the globalist groups that determine the strategy and tactics of the global-warming industry, you can't ignore the fact that it is identical to the centralized control of the world that will be in the hands of the prophesied Antichrist. The AGW alarmist camp and the socialist-Marxist elite that pulls the strings will not rest until they achieve global control—politically, socially, economically, and militarily. They will not stop until they have abrogated and nullified national constitutions and your own personal freedoms.

Some of the key scientists in the AGW movement falsify historical temperature data to make it conform to their agenda. The global-warming alarmists silence climate-change critics to avoid public debate over the scientific validity of AGW theory. This is not just poor science, it is a deliberate deception. This systematic fraud can be traced to an international elite that is bent on forcing democratic governments to support a globalist autocracy. The fight against global warming is what they have decided to use for leverage.

Consider the prophet Daniel's description of the Antichrist, the coming leader of the future global government:

And in the latter time of their kingdom, when the transgressors are come to the full, a king of fierce countenance, and understanding dark sentences, shall stand up.

And his power shall be mighty, but not by his own power: and he shall destroy wonderfully, and shall prosper, and practise, and shall destroy the mighty and the holy people.

And through his policy also he shall cause craft to prosper in his hand; and he shall magnify himself in his heart, and by peace shall destroy many: he shall also stand up against the Prince of princes; but he shall be broken without hand. (8:23–25)

Those who support the AGW alarmists include national government leaders, politicians, scientists, members of the news media, private organizations, multinational companies, and members of the intellectual elite. Their agenda is decidedly anti-Western, antidemocracy, and anticapitalism. The methodology is complex but readily apparent: massive scientific hype and exaggeration, falsification of historical temperature data, and negating well-established scientific data (such as the Medieval Warm Period and the Little Ice Age). Anything that disproves the AGW theory is discounted, silenced, or falsified.

They speak of rapidly melting polar icecaps, the threat of a dramatic rise in sea levels, increasing global temperatures, the destruction of entire species due to climate change, and other environmental "threats" to the survival of humanity—unless we take drastic action to reduce carbon dioxide (CO_2) emissions. The unspoken agenda is to promote fear and dread among citizens

(including schoolchildren), politicians, business leaders, and governments. But why do they resort to scare tactics?

The first reason is because fear is an effective motivator, and the news media love scary headlines. Fear sells.

The second reason is because fearful citizens and politicians feel great urgency to "do something!" Fear of global doom can be used to force sovereign nations to accept enormous social and political changes: massive reductions in the quality of life and standard of living, while accepting the burden of massive taxation, with most of the tax revenues going overseas. All this and more simply to respond to a *fabricated and exaggerated* environmental threat. It's not too strong to call this "international environmental extortion."

The hidden AGW end game is to weaken and eventually subvert Western free-market economies, sovereign nations, and capitalistic democracies. This will enable the socialist-Marxist elite to take control of commerce, economics, politics, and national governments. Using the false threat of man-made global warming as the wedge, the globalist elite want to impose their full political agenda. They won't stop until they have established an unchallenged global government controlled by an intellectual, scientific, and political elite.

LIVING IN PROPHETIC TIMES

We are living in remarkable times—the most exciting in history. Our era has witnessed tremendous progress in science, medicine, and the proclamation of the gospel of Christ throughout the world. At the same time, we are living in deeply troubling and dangerous times. We need to be in prayer, asking God for clearer spiritual vision, for discernment, and for a fuller knowledge of His truth as revealed in the Scriptures. We are beginning to see more clearly the most dangerous aspects of the AGW movement. The AGW elitists want to use our love for the environment (God's creation) to manipulate us and de-

stroy the fundamental Judeo-Christian political, economic, and spiritual values that form the philosophical foundation of the United States and Canada.

This much is clear from Scripture: The Antichrist will consolidate all political, economic, social, and military power on a scale never before seen on earth. He will rise to rule the world initially through his control of a confederation of ten major European and North African—Mediterranean nations. This will be the fulfillment of the prophesied revival of the ancient Roman Empire, which both Daniel and John foretold (see Daniel 2; Revelation 13). Daniel's visions take on an undeniable sense of urgency for us because he was describing *our own generation*. The prophetic future is now at the door.

The Scriptures warn us of the events that will occur prior to the return of Jesus Christ. The Antichrist and his partner, the False Prophet, will orchestrate the implementation of the Mark of the Beast, a totalitarian police system whereby every person on earth will be tracked during the last three and a half years of the Great Tribulation, prior to the Battle of Armageddon. Those who accept the Mark of the Beast will be free to do business, to work, to make purchases, and to exchange money for services. They will be allowed to lead a semblance of a normal life (see Revelation 13:16–17). But by accepting the mark 666, a person is acknowledging his or her spiritual submission to the Antichrist as "god."

As you read about the AGW movement and its strategies to subvert Western democracies, you will see close parallels to the Bible's descriptions of political and spiritual developments in the last days. It would be easy to feel fearful or anxious in light of the tremendous success of the propagandists and policy makers within the AGW movement. But we need to remember that in all these things, God is the Lord of the universe. He is the sovereign Creator and Sustainer of the world.

God has not left us without hope or without the necessary prophetic revelation of the coming future. He has provided prophetic knowledge in the Scriptures in advance of the Second Coming. As you study the signs of the end times, thank God that the troubling events in our days are setting the stage for the long-awaited return of Jesus Christ. After the terrible days of the seven-year Tribulation, Christ will return with His resurrected Christians to defeat Satan. At that time, He will establish His millennial rule on earth. He will finally establish the righteous government that humanity has longed for since the Garden of Eden.

I believe the Antichrist is now alive and preparing to position himself for a phenomenal rise to political power, first in Europe and then globally. I do not know the timing, but I am convinced that it will occur in our lifetime. Daniel 8:23 tells us that the future ruler of the earth will arise "in the latter time of their kingdom" and that "when the transgressors are come to the full, a king of fierce countenance, and understanding dark sentences, shall stand up." The Antichrist will be totally possessed spiritually by Satan, filled with satanic power, and deeply involved with occult power and practices.

The Antichrist's initial political success will cause him to "magnify himself in his heart" and will lead to his blaspheming God (Daniel 8:25). The Antichrist will meet his doom when he battles the armies of heaven at the prophesied Battle of Armageddon and encounters the Lord Jesus Christ and the armies of heaven. Christ will cast him forever into the lake of fire (see Revelation 19:11–21).

PREACHERS OF DECEPTION

I have acquired an extensive library of historical, scientific, political, and prophetic research concerning global government and the world's greatest, most far-reaching, and most devastating pseudoscientific environmental deception. If the forces behind man-made global warming are not stopped, citizens

of the West will lose their standard of living and the economic, political, and religious freedoms they value.

The worldview of those who embrace the global-warming theory holds that the existence of the earth, its solar system, and its extremely complex climate system are simply a random accident. They deny divine creation and any plan, purpose, or intention behind the existence of the world. Following that philosophy, leaders of the AGW movement believe they can assume authority to make decisions for the entire human population and for the earth itself. If there is no higher Authority in the universe, as they insist, then they have no Creator or God to answer to. They feel they are free to act in their own political interest, even at the expense of the rest of humanity.

Due to the effectiveness of their propaganda campaign and their skill at manipulating political, educational, and media leaders, the world's population has embraced an astonishingly misguided, extreme "green" philosophy. At the forefront of that philosophy is the demand that humanity dramatically reduce carbon dioxide (CO₂) emissions. The false theory that is presented as an incontrovertible fact is that burning fossil fuels (coal, oil, natural gas) to produce energy is the primary cause of global warming. The rapid warming of the earth's atmosphere, according to AGW theory, will devastate the earth's climate and, ultimately, human life and other species during the next century. The unfounded climate theory, preached as scientific orthodoxy, is built on deliberate deceptions regarding historical falsified temperature records and an unproven scientific climate hypothesis.

The global-government elite, working without legal or constitutional sanction, push the global-warming agenda as the means to achieve their real political goal: establishing a one-world government. The AGW campaign involves requiring by law and international treaty immediate massive reductions in humanity's use of essential fossil fuels, regardless of the massive

damage to a nation's economy, industrial production, agriculture, military readiness, and standard of living.

If the citizens of the West fail to challenge the global-warming deception, we can expect to lose the precious liberty our forefathers fought to preserve. In light of the threat posed by AGW alarmists to our freedoms, there are several vital questions that every one of us must seriously consider.

- Is the man-made global-warming crisis a genuine environmental crisis or a skillfully presented lie?
- Is AGW a scientifically proven fact, or is it nothing more than an environmental opinion or preference that is presented as an established scientific theory?
- Is the global-warming "crisis" a fabricated threat that is used to manipulate governments and individual citizens in order to advance a hidden globalist and socialist economic agenda?
- Will a drastic reduction in CO₂ emissions seriously reduce the average global temperature on earth by the year 2100, as the global-warming alarmists propose?
- Is the true primary motive of the AGW movement the minimization of the rise in global temperatures, or is there a sinister and devastating political and economic goal that is never revealed to the public?

The evidence that you will read in the following chapters will show that the claims of the major global-warming alarmists are built on exaggerations and lies. The claims are not supported by independent, verified scientific analysis. The "settled science" of climate change is in reality nothing more authoritative than oft-repeated, loudly proclaimed, high-pressure environmentalist propaganda. The goal of the loudest voices in the movement—including the United Nations Intergovernmental Panel on Climate Change (IPCC) and Al Gore's film *An Inconvenient Truth*—is to frighten citizens,

scientists, politicians, and the news media to support an unprecedented growth in global government. An AGW subplot (again, never openly revealed) is to gain socialist-Marxist control of the industries and economies of every nation on earth.

BE PREPARED TO DEFEND YOUR LIBERTIES

Again and again, the message of the Scriptures is to be prepared, and much of being prepared involves becoming aware of the dangers. If the Western nations submit to the demands of the AGW movement, it will result in several disasters. The AGW plans to drastically limit man-made global warming will inevitably have the following consequences:

- the destruction of tens of millions of jobs in the United States
- the transfer from the West of hundreds of billions of dollars in economic production annually, which will be sent to the Third World, including China and India as well as Africa
- seriously reduced or reversed economic growth in both the developed nations and the Third World
- a dramatically reduced standard of living for most Americans
- destruction of our political and personal freedoms by creating intrusive new political powers and regulations that will control every citizen's private, financial, social, and business life
- drastically reduced production of essential fertilizers and other
 petroleum-based agrichemicals, resulting in decreased food
 production. This will have devastating ramifications for feeding
 the rapidly growing populations of Third World nations, since
 Western democracies supply most of the essential petroleumbased fertilizers and food exports that are vitally needed in the
 developing world.

Proposed and existing global-warming legislation, such as the Kyoto Protocol, working in combination with new carbon taxes, higher costs for living and doing business, and new cap-and-trade energy regulations, will have a devastating impact on the prosperity of Western democracies. Increased energy costs alone, caused by new anti-global-warming regulations, will seriously limit economic growth. At the same time, expensive renewable energy, such as wind and solar, will handicap billions of Third World citizens who are working desperately to improve their economic situation. Cheap, reliable energy (from fossil fuels) is essential for people to raise their standard of living from subsistence-level living. As the AGW movement consolidates its power, cheap reliable electricity generated from fossil fuels will become scarce and much more expensive.

THE GLOBAL POLITICS OF GLOBAL WARMING

During his first press conference as incoming European Council president, Herman Van Rompuy hailed 2009 as "the first year of global governance," a reference to the globalist G20 (Group of Twenty, an association of established and developing nations) agenda. He went on to describe the Copenhagen climate summit, a major international initiative orchestrated by AGW alarmists, as "another step towards the global management of our planet."

Mike Thompson, chief meteorologist at Kansas City's WDAF television, sent an e-mail to the *Kansas City Star* stating that the global-warming movement "has become completely political—it's not about science at all.... If science were the objective, then we would be seeing an entirely different debate. But there are agendas at play, and it has undermined the credibility of climate science."²

Higher energy costs created by unnecessary limits on the use of fossil fuels are just one of the roundabout ways the AGW forces are slowly bringing the Western world—and beyond that, the developing world—to its knees economically. The globalist elite, pursuing their world-government and socialist-Marxist goals, long ago decided to first promote and then hijack the AGW movement. Their ultimate goal is to quietly transform the economies and the balance of political power in the West and around the world.

Havel Wolf, a leading member of the Seattle Audubon Society, strongly supports the AGW position. Wolf declared his real political agenda in 1998, stating that the Communist Party USA's environmental program "presents a viable plan to carry out on the long march to socialism."

According to A Skeptical Layman's Guide to Man-Made Global Warming, "In America, socialism is bent on removing individual freedoms and placing the government in charge of our lives. The global warming issue is an important strategy for the advancement of socialism, under the guise of saving the Earth."⁴

Professor Louis Proyect of Columbia University is quoted as saying, "The answer to global warming is in the abolition of private property and production for human need. A socialist world would place an enormous priority on alternative energy sources. This is what ecologically-minded socialists have been exploring for quite some time now."

Maurice F. Strong, a Canadian billionaire, served as conference secretary-general of the pivotal Rio Earth Summit in 1992. The summit attracted the participation of 172 nations and 108 heads of state. Strong, a supporter of global government, has declared, "Current lifestyles and consumption patterns of the affluent middle class—involving high meat intake,…use of fossil fuels, appliances, home and work-place air-conditioning, and suburban housing—are not sustainable. A shift is necessary towards lifestyles less geared to environmentally damaging consumption patterns."

The long-term goal of such environmental ideology is nothing less than the imposition of massive legal, financial, and environmental restrictions on your government, your business, and your personal lifestyle. AGW supporters want to dictate your diet, your air conditioning, and your driving choices. Even Nazi Germany and Soviet Russia did not micromanage the lifestyles of individual citizens to this intrusive degree.

Internet and journal articles about global warming and socialism often quote Al Gore: "We must take bold and unequivocal action: we must make the rescue of the environment *the central organizing principle* for civilization." Gore's goal—and the goal of many of those who are promoting the manmade global-warming agenda—is to utterly transform Western society. This means moving the West away from Judeo-Christian principles, democracy, a free-enterprise market economy, and the protection of private-property rights as fundamental to a free society. The AGW alarmists will not be satisfied until they have enacted and enforced enormous increases in carbon energy taxes and massive environmental regulations, much of it linked to limiting carbon emissions. But limiting carbon emissions is actually a front for achieving the transformation of previously free-enterprise-based, democratic nations into a new socialist global government.

Having studied the history and political trends that are evident in the European Union, the world's first transnational superstate, I can assure you that true democracy and responsive representative government in Europe have already been transformed into something virtually unrecognizable. Sovereign nations have been reconstituted into a 500-million-citizen, twenty-sevennation monstrous unresponsive bureaucracy. In the European Union, decisions are now made in secret by an elite twenty-seven-member European Commission. This sovereign, appointed policy-making body is not accountable to voters. Working alone, it chooses and enacts the policies, laws, taxes, regulations, and executives that control the lives of half a billion citizens of a formerly democratic Europe. Welcome to a preview of the coming global government.

SOCIALISM AND THE GLOBAL-WARMING INDUSTRY

An enormous number of people work in the climate-change community. This includes climate scientists, academics, financial leaders, media personalities, nongovernmental organizations, politicians, bureaucrats, United Nations officials, investors in "green" industries, and huge multinational corporations. Together, these individuals, groups, institutions, and corporations form the "global-warming industry." Those in the "industry" have committed their careers, finances, and reputations to the support and propagation of the AGW theory. Any serious examination of the writings and speeches of those who lead the global-warming industry reveals an unvarying tendency to promote much greater government intervention in the lives of all citizens.

Leaders of the global-warming complex are motivated by a desire to bankrupt sovereign Western nations. A primary approach already being used is to create a straitjacket of environmental and economic regulations, excessive energy taxes, and laws that drain the economies of nations that support the global-warming agenda. The resulting weakness motivates the leaders and citizens to submit to the global treaties that reduce their national sovereignty and independence.

Remarkably, the Spanish government, one of the strongest European socialist supporters of anticarbon policies, admitted to the economically disabling effects of adhering to AGW policies and requirements. In a secret report leaked in May 2010, Spain acknowledged it was facing an unprecedented economic disaster primarily due to excessive national debt and growing deficits caused by its extreme environmental policies. Spain has been spending enormous amounts of money on promoting inefficient wind power and solar panels, which has added billions of euros annually to the energy costs of Spanish citizens. The cost of all the energy produced in Spain,

including wind, solar, and coal, has doubled due to their expensive renewable-energy policies.⁸

Incredibly, the Obama administration and Democratic members of the U.S. Senate followed Spain's pro-renewable energy policies and introduced their anticarbon legislative agenda, which was misleadingly called the American Power Act. For reasons that are obvious, based on the candid admissions of the government of Spain, this proposed legislation should be called the American Power-Grab Act.

Beyond the very effective use of propaganda, the best tools available to the supporters of AGW are laws, regulations, AGW educational programs, and international treaties. We have seen proposals by environmentalists to use laws and environmental regulations not only to influence the marketplace but also to micromanage the lives and personal activities of individual citizens. The AGW supporters would have you believe that government control, a reduced standard of living, and loss of freedom are necessary to save the world. What follows is only a partial list of the proposed environmental regulations. But it is enough to provide a preview of the coming restrictions, laws, and taxes that AGW environmentalists have planned for you and your neighbors.

- ban open fires and wood-burning and coal-burning stoves
- ban incandescent light bulbs
- ban bottled water
- ban private cars from some areas
- ban plasma televisions
- ban new airports and the expansion of existing airports
- ban "standby mode" on appliances (which is what allows remotes to turn them on)
- ban coal-fired electric-power generation
- ban electric hot-water systems
- ban families from vacationing by car

- ban three-day weekends that encourage vacation travel
- tax babies to force people to commit to family planning, resulting in fewer children
- tax large cars that get lower gas mileage
- tax an individual's production of rubbish
- tax second homes
- tax second cars
- · tax holiday airline flights
- tax electricity in order to generate revenue to subsidize solar power
- levy an eco-tax on cars entering cities
- require permits to drive your car outside your city
- limit one's choice when buying a new appliance
- issue carbon credits (limits annually) to every person and family
- remove white lines on roads to make motorists drive more carefully⁹

We are fast approaching a major crisis. I anticipate the introduction of measures to reduce agricultural yield and food production in both the West and the Third World. These measures include limitations on fertilizer production and use, higher energy costs, and other restrictions, as well as regulations that will limit agriculture in the biggest food-producing nations. The result will be that the West will be less able to assist in efforts to feed the Third World, radically shifting world opinion against the West and its generally democratic ideology.

EXPOSING THE ULTIMATE GOAL

A far-reaching political conspiracy is well underway to position man-made global warming as the *leading threat* to humanity and the earth's climate. In

later chapters we will discuss the deliberate falsification of historic temperature data, the silencing of skeptical climate scientists whose research has disproved AGW, and other pertinent climate data. But for now, it is important to establish that the effort to utilize man-made global warming as a lever to achieve world domination is already far advanced in its implementation.

The history and development of the man-made global-warming conspiracy is relatively easy to document. The Club of Rome, a globalist European think tank, published in 1993 a document titled "The First Global Revolution." This document outlines their plans to use the fabricated environmental crisis of global warming to stampede humanity to achieve the club's hidden goal: global government. The chilling language of the document reveals their deeply cynical plans to impose global government on all citizens of every nation:

In searching for a common enemy against whom we can unite, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like, would fit the bill. In their totality and their interactions these phenomena do constitute a common threat which must be confronted by everyone together.... All these dangers are caused by human intervention in natural processes, and it is only through changed attitudes and behavior that they can be overcome. The real enemy then is humanity itself.¹⁰

Please carefully consider the implications of the final sentence: "The real enemy then is humanity itself." Throughout this book you will see evidence of the AGW movement's preference for nonhuman species, including their goal to achieve the massive reduction of the human population of earth.

The deep cynicism and deceit of the global-warming alarmists is con-

firmed in this statement by Professor Daniel Botkin: "Some colleagues who share some of my doubts [about global warming and its possible causes] argue that the only way to get our society to truly change is to frighten people with the possibility of a catastrophe."

I will demonstrate in chapter 3 that the propaganda claims made by global-warming alarmists are inflated and often patently false. Their initial purpose, by their own admission, was to create a worldwide wave of environmental fear and panic that served to motivate political leaders, the media, and billions of people to support climate-change policies. Those policies will have the effect of diverting hundreds of billions of tax dollars annually out of the economies of Western nations and into ineffective efforts to reduce the Third World's annual production of CO₂.

North Americans and Europeans are familiar with the leading exponent of man-made global warming, Al Gore. Gore wrote in his 1992 pivotal environmental book *Earth in the Balance:* "Adopting a central organizing principle—one agreed to voluntarily—means embarking on an all-out effort to use every policy and program, every law and institution, every treaty and alliance, every tactic and strategy, every plan and course of action—to use in short, every means to halt the destruction of the environment and to preserve and nurture our ecological system." In other words, Gore demands that everyone embrace the cause of saving the planet from man-made global warming as the only effective way to mobilize the public to demand massive economic, political, and social change to save the environment.

American novelist, essayist, and humorist Mark Twain once stated, "Everybody talks about the weather, but nobody does anything about it." Today, a global environmental movement claims that it is trying to change the global climate, but in reality it is pursuing a very different goal and a hidden political agenda.

The man-made global-warming alarmist campaign is intended to produce a powerful world-governmental body under the authority of the United Nations. This new global regime will constitute a socialist-Marxist environmental dictatorship that will possess total legal authority to control the lives and actions of every citizen, every corporation, and every nation on earth. It will gain political control by using the illusion that unquestioned environmental regulation is essential to save humanity from an imminent global-warming catastrophe. The reality, however, is that the global-warming deception is the greatest fraud in the history of science.

Professor Harold Lewis, one of the most respected and published physicists in the world, is emeritus professor of physics at the University of California, Santa Barbara. After sixty-seven years of membership, in October 2010, Dr. Lewis sent his letter of resignation to the American Physical Society (one of the United States' most prestigious scientific organizations) addressed to its president, Curtis G. Callan Jr, at Princeton University. Dr. Lewis wrote: "[Global warming] is the greatest and most successful pseudoscientific fraud I have seen in my long life."¹³

The evidence in the following chapters will document that this global-warming campaign has little to do with saving the earth. *National Post* commentator Peter Foster wrote about the true motives of AGW alarmists: "Leftists are inclined to believe in climate change because its 'solutions'—central control and wealth redistribution—are things they already desire." ¹⁴

Dr. Kiminori Itoh, a Japanese member of the IPCC as well as an award-winning environmental physical chemist and scientist, warned about the ultimate fallout when the general public becomes aware of the gigantic hoax of man-made global-warming alarmism: "Warming fears are the 'worst scientific scandal' in...history.... When people come to know what the truth is, they will feel deceived by science and scientists." 15

THE CHRISTIAN'S PERSPECTIVE

Every new piece of evidence of the fulfillment of end-times prophecy in our generation alerts us to the soon return of Jesus Christ. We are also assured by the Bible that humanity does not possess the power to destroy the earth—either gradually through climate change or through sudden cataclysm, such as nuclear holocaust. God and only God holds the power to alter the earth, and the earth's future remains securely in His hands. As the Scriptures declare, "One generation passeth away, and another generation cometh: but the earth abideth forever" (Ecclesiastes 1:4). The destiny of the earth and humanity remains solely in God's command.

Globalists are using scare tactics to promote a counterfeit environmental crisis. They make liberal use of media deception as well as falsified historical temperature data and spurious climate research. They espouse their theories, calling them factual and science based, while in truth they are based on a massive deception. The globalists have reframed the research data and, in some cases, silenced scientists whose research contradicts their AGW propaganda. They trumpet their own skewed computer-model scenarios in an effort to push representatives of sovereign nations toward world government, fueled by humanity's unwarranted fear of a coming climate disaster.

While the globalists use fear of man-made global warming as a tactic and methodology, Christians know that the holy love of our all-powerful God banishes all fear: "There is no fear in love; but perfect love casteth out fear: because fear hath torment. He that feareth is not made perfect in love" (1 John 4:18). Truth will guide us and reassure us as we learn the truth about the AGW deception, and as we decide how to expose the AGW deception and stand for God and His truth in the world.
