## LOVE CARDS

Print this page and cut out each card along the dotted lines. Use them as bookmarks, insert them into lunch boxes, or hand them out as valentines!

# DIY FLUFFY

# ValenSLIME

Host your slime-making party this Valentine's Day with a slime recipe you can make at home! This activity is sure to bring hours of fun and play! Suitable for ages 4 and above.

## What you'll need (makes about 32 oz)

3 cups foam shaving cream

½ cup washable white PVA school glue

1 - 1 ½ tablespoons saline solution containing boric acid and sodium borate

½ cup water

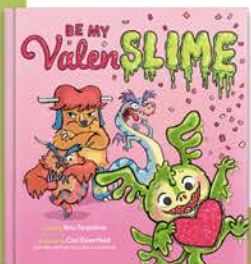

½ teaspoon baking soda

Liquid food coloring of your choice

Large mixing bowl and spatula

**MONSTERS AND PEOPLE  
DON'T EAT SLIME!  
ADULT SUPERVISION  
IS RECOMMENDED.**

Try making colored batches of fluffy slime and mix them! Or introduce heart and monster-shaped cookie cutters for more sensory fun!

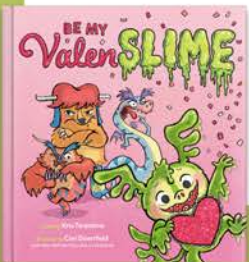

## Directions

- ♥ Combine the foam shaving cream and begin with 2-3 drops of food coloring in a large mixing bowl. Mix slowly with a spatula to keep the mixture fluffy. Continue adding food coloring until you are satisfied with the color.
- ♥ Pour in the water and glue. Mix again.
- ♥ Add baking soda, which helps thicken the slime. Begin with  $\frac{1}{4}$  teaspoon, mix, and continue to add the rest as you stir the mixture.
- ♥ Stir in a tablespoon of saline solution to activate your slime.
- ♥ Add a few drops of the remaining saline solution to clean hands (this prevents the slime from sticking) and gently knead the mixture. The slime will begin forming when it pulls away from the bowl.
  - 👉 You may need more activators depending on the brand of saline solution you use. The more saline solution you add, the stiffer your slime will be.
  - 👉 It is common for slime to be stringy and sticky as you begin kneading it. Continue kneading and stretching slowly until the slime consistency changes.
- ♥ If the slime consistency does not change after kneading, rest in a clean container for a few minutes.
- ♥ Always store your slime in a clean, covered container!

Consider wearing gloves while making slime.

Remember to wash your hands before and after the activity!

# DIY GLITTER

# ValenSLIME VALENTINES

Are you looking for DIY gifts? Try this scented Snoodle-themed glitter slime recipe! You can bottle them in little jars personalized with printable Snoodle labels to hand out as valentines! This activity is suitable for ages 4 and above.

## What you'll need (makes about 8 oz)

1 tablespoon green or red flavored Jello gelatin powder

1 - 2 tablespoons saline solution containing boric acid and sodium borate

½ cup clear washable PVA school glue

½ teaspoon baking soda

½ cup water

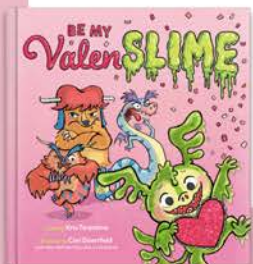

Glitter or confetti

Large mixing bowl and spoon

Small condiment sized jars or containers

Making slime can be messy! Keep long hair tied up and wear an apron. White vinegar can help remove slime from clothes.

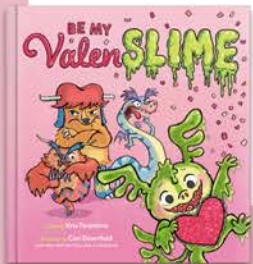

## Directions

- ♥ Combine the water, glue, and gelatin powder in a large mixing bowl and mix well with a spoon.
- ♥ Stir in the glitter or confetti and mix again.
- ♥ Add baking soda, which helps thicken the slime. Begin with  $\frac{1}{4}$  teaspoon, mix, and continue to add more as you stir the mixture.
- ♥ Pour in a tablespoon of saline solution to activate your slime. Stir to combine. The slime will begin forming when it pulls away from the bowl.
- ♥ Add a few drops of the remaining saline solution to clean hands (this prevents the slime from sticking) and gently knead the mixture. You will notice the slime forming as it pulls away from the sides of the bowl.
  - 👉 You may need more activators depending on the brand of saline solution you use. The more saline solution you add, the stiffer your slime will be.
  - 👉 Slime can be stringy and sticky when you begin kneading it. Continue kneading and stretching slowly until the slime consistency changes. You may also set it aside to rest in a clean container for a few minutes.
- ♥ When the slime is ready, portion it out into small containers. Stick a Snoodle label on each jar (see printable on the next page), and your valentines are ready!

Consider wearing gloves while making slime.

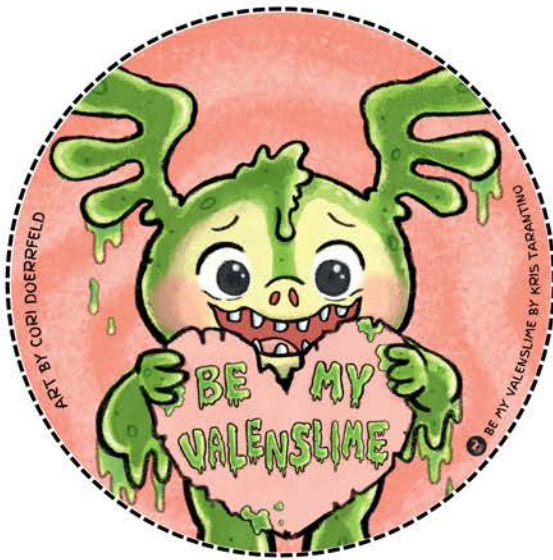

Remember to wash your hands before and after the activity!

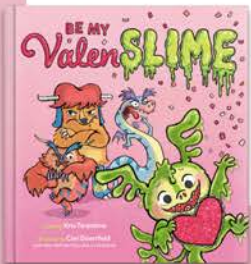

Check out these Snoodle labels for your slime valentines!  
Available in two sizes for small and large jars!

Print this page and cut out the labels along the dotted lines.  
Apply double sided tape to the back of each label and  
affix it to your slime container.

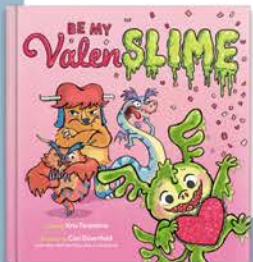

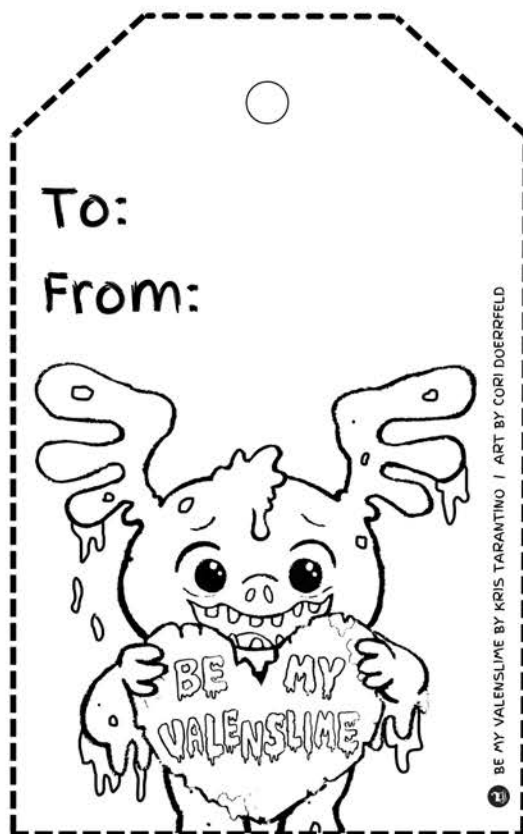

# ValenSLIME

## GIFT TAGS

Add a monstery touch of love with DIY gift tags featuring Snoodle and her monster friends from the book!

Print this page and cut out the gift tags along the dotted lines. Use a single-hole puncher to make a hole in the center of each tag for a ribbon or string. Personalize your tags with color and lots of love!

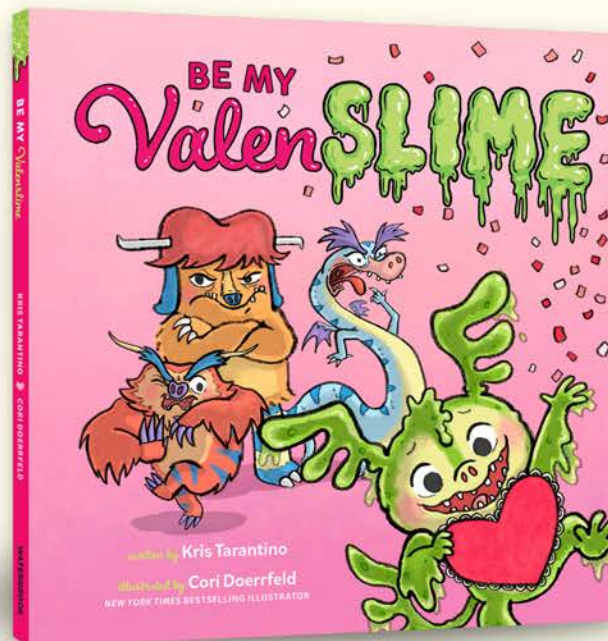

# What's Love Anyway?

Hi there! Thank you for downloading this resource inspired by my book, BE MY VALENSLIME! The story takes readers on a laugh-out-loud exploration of love full of monster mayhem!

BE MY VALENSLIME brings together the definition of everyday love on a kid-to-kid friendship level that shows children how words and actions knitted together with love can influence others in a positive, healthy way. It reminds us that love is worth celebrating, at its best and its messiest. I hope you'll enjoy reading it!
